

# A NECESSARY DESTINATION

We have put sustainability at the core of our business and have therefore created a long-term strategy that we have named “A Necessary Destination” to promote the social, environmental and economic development of the region.

**We invite you to watch the event launch where you can learn about our projects and the path to becoming a sustainable group.**

## Our “Necessary Destination” is based on four pillars:

- 

**ENVIRONMENTAL MANAGEMENT**

  - 

We will implement a **world-class environmental management system** that will allow us to control and mitigate our environmental impacts.
- 

**CLIMATE CHANGE**

  - 

We will work to **offset 50% of domestic emissions by 2030, establishing a path to be carbon neutral by 2050**, through collaborative projects to conserve and offset iconic ecosystems in South America.
  - 

We will seek to **reduce our emissions** through new technologies in our aircraft and **the development of sustainable alternative fuels**. In parallel, we will promote the **“Compensate Your Trip” program, which will allow us to offer our passengers, corporate and cargo customers the option of offsetting the CO2 emissions associated with their trips**. In addition, LATAM will offset the same amount of CO2 emissions as customers (1+1 program).
- 

**CIRCULAR ECONOMY**

  - 

We aim to be **a zero waste-to-landfill group by 2027**. We will eliminate single-use plastics by 2023.
  - 

We will strengthen **our Second Flight Plan**, an initiative through which we take care of the textile waste produced by changing uniforms each year, transforming garments into new products that highlight the diverse cultures of South America.
- 

**SHARED VALUE**

  - 

**Our Solidarity Plane program, with 10 years of history, will be more active than ever**, providing free support to health needs in the region, promoting environmental care and helping in case of natural disasters.
